

Collaboration

Review Transcript

You should now be ready to utilize two of TWEN's collaboration tools: wikis and class polls. Wikis will allow you to easily collaborate with your classmates and sub-groups, as well as to work on extracurricular team projects, including moot court and law review. The polling feature allows your professor to easily get feedback from the class, as well as assess your understanding of key concepts.

To practice these skills, complete the Collaboration Unit simulation.

Remember, as with each of the units in this course, you may revisit the Collaboration Unit at any point during your law school studies.
